

THERE'S A NEW WAY TO SAVE WITH SOLAR

Go solar without paying for the system

With Origin, there's a new way for solar energy to be delivered to your home. We've called it '**Solar Flex**' and it's here to make solar easier and more accessible. For starters, you won't have to pay to have the system installed, we'll cover that. Plus, as we own the solar system, we'll take care of any ongoing maintenance costs.

Why choose Solar Flex?

You'll pay \$0 for the system*

You'll lock in a low solar energy rate^

You won't have the hassle of managing the ongoing maintenance and monitoring of the system.

How it works

Step 1: We'll have one of our Solar Specialists look at your situation – they'll make sure it's the right solution for your energy usage and check that it can be installed at your home.

Step 2: You can choose a contract period that suits you – with 10 or 15 year terms available.

Step 3: If you decide to go ahead, you'll enter into an Origin Solar Flex agreement and we'll lock in a low solar contract rate^.

Step 4: Once all that's sorted, we'll have the solar system installed at a time that suits.

Step 5: From then on, you'll start paying for the solar power you generate at the low energy rate.

You might like to look over our [Frequently Asked Questions page](#) – there's some helpful information about the Origin Solar Flex Agreement.

Is it right for me?

Our Solar Specialists will look over things to make sure Solar Flex is right for you. But, here are some things to think about:

- Solar Flex works great for households who use power during the day. Do you have a home office, swimming pool, electric hot water system or even run air conditioners during the day on weekends?
- The solar energy generated from the system isn't stored for later, however in many States you should still be able to receive the solar feed in tariff from your energy provider for the solar that you don't use.

What if my circumstances change?

We understand that things can change and we've allowed for that in our Solar Flex agreement. You can:

- End your agreement by paying an exit fee
- Buy the solar system from us (you'll find the price in your initial contract).

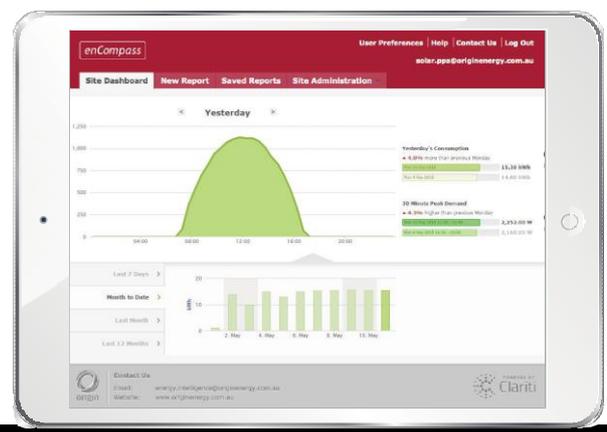

If you sell your home, the new owner will be given the choice to continue using the solar system the same way you did. If interested, they'll just need to meet our credit requirements and enter into an agreement with us – then they can take up the balance of the contract where you left off and get the same low solar rate.

What happens at the end of my contract?

- ① Solar systems last a long time, so if you're happy with the way things are going, we don't need to change anything. You'll just continue paying for the energy generated by the solar system at a new rate.
- ② If you're ready to make it yours, you might like to offer to buy the system from us.
- ③ Or if you prefer to pay for it to be removed, that's ok too – we can sort that out.

Can I check how the solar system is performing?

You sure can. All you need to do is access your personalised portal – it'll tell you how much solar power the system is generating.
